

# JAHANZAIB ZAFAR

Full Stack Developer | PHP, Laravel, Node.js | REST APIs | SaaS Architecture

+92-306-7648159 • jahanzaibryk2020@gmail.com •  •  • Islamabad, Pakistan

## PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable SaaS, e-commerce, marketplace, booking, business applications and product-based application using **PHP, Laravel** and **Node.js**. Strong expertise in **multi-tenant SaaS architecture, backend development, third-party API integrations, payment systems, webhooks, authentication, and database optimization**. Frontend experience with **Bootstrap, Next.js** and **Vue.js**, building responsive, API-driven web applications. Experienced delivering production-ready solutions with a focus on clean architecture, performance, security, and reliable business workflows.

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

DCodax Technologies

10/2025 – 08/2026

Islamabad, Pakistan

- Architected a multi-tenant Laravel backend serving e-commerce, real estate, and restaurant delivery platforms, enabling multiple client deployments from a shared codebase while reducing duplicated infrastructure.
- Designed and developed REST APIs supporting iOS and Android applications while maintaining a single source of truth for business logic.
- Engineered Stripe payment integration with signed webhook verification and idempotency handling, closing the failure path that caused duplicate and failed transaction events.
- Owned client-facing technical scoping — translated business requirements directly into system architecture and API contracts, cutting the gap between what clients asked for and what got built.

### Full Stack Developer

Crexed Software Company

10/2024 – 09/2025

Bahawalpur, Pakistan

- Led full-cycle system design for enterprise e-commerce platforms from database schema through API layer to production.
- Built subscription billing engine with tiered pricing logic and Stripe webhook-driven transaction state management.
- Integrated third-party payment, SMS, and mapping APIs into a unified backend service layer, standardizing how the application talks to external systems.
- Established code review process across the team to catch issues before production.

### PHP/Laravel Developer (Remote)

Pixelz360

08/2022 – 06/2024

Karachi, Pakistan

- Refactored legacy PHP codebase into modular, reusable service classes cutting duplicated logic and reducing shipping time.
- Optimized SQL queries to improve CRM and HRM application performance.
- Managed production schema migrations supporting API releases.

## PROJECTS

### Pikup — Multi-Vendor Restaurant SaaS Platform

- Engineered a multi-tenant SaaS REST API powering customer, restaurant, and delivery-partner apps for a French food-delivery platform.
- Supported table reservations and commission-based restaurant onboarding at scale.
- Delivered third-party integration with Uber Direct (delivery dispatch) and Deliverect (POS syncing).
- Implemented GPS-based live order tracking across a distributed, multi-role app ecosystem.

### ForAllDoctors — Global Professional Network Platform

- Built the REST API backend for an international professional network serving doctors, lawyers, and PhDs.
- Implemented end-to-end encrypted messaging, verified-membership workflows, and searchable professional profiles.
- Delivered classifieds, forums, groups, articles, and continuing-education modules powering a high-trust, credential-gated community.

### Borrowmate — Multi-Vendor Rental Platform

- Built the backend for a peer-to-peer rental marketplace spanning tools, electronics, properties, and event gear.
- Implemented search, booking, and wishlist functionality across the platform.
- Delivered third-party integration with Till Payments for transactions and Weavy for real-time chat.
- Integrated ConnectID for digital identity verification to support secure, compliant peer-to-peer commerce at national scale.

### Cuatrod — Real Estate Subdivision Management Platform

- Built the backend for a real estate subdivision platform tracking customers, lots, supervisors, and technicians.
- Designed an automated warranty-claim ticketing system that routes claims to the responsible subdivision supervisor.
- Enabled site inspection, evidence capture, and resolution workflows, reducing manual claims triage.

### WeCares — Multi-Vendor Healthcare E-Commerce Platform

- Built the backend for a Dubai-based multi-vendor healthcare and wellness marketplace.
- Covered mobility aids, medical devices, pharmacy, fitness, and nutrition product categories.
- Built the central admin panel, vendor storefronts, and customer ordering flows across web and mobile.
- Architected the system to handle regulated healthcare product categories at regional scale.

### Napa Stores — Multi-Vendor Delivery Marketplace

- Built the backend for a multi-vendor grocery and beverage delivery marketplace.
- Delivered role-based apps for customers, sellers, and delivery drivers.
- Powered live order tracking and marketplace management across iOS and Android in a fast-scaling regional market.

### GOT App & Braaap.ae — Offroad Adventure Community Platform

- Built backend systems for a UAE offroad riding community.
- Implemented event booking and calendars for tours, training workshops, and group rides.
- Delivered GPS route mapping for ride planning and navigation.
- Built a dual-surface marketplace (in-app classifieds plus the standalone braaap.ae platform) for motorcycles, 4x4s, and gear.

## CORE SKILLS

---

**Backend Frameworks & Languages:** PHP, Laravel, Node.js (ExpressJs), REST API Development, GraphQL

**Frontend Frameworks & Languages:** Next.js, Vue.js, Bootstrap

**Database & Caching:** MySQL, PostgreSQL, Database Optimization

**Security & Authentication:** API Security, OAuth 2.0, JWT Authentication, Laravel Passport & Sanctum

**Third-Party Integration & Payments:** Third-Party API Integration, Payment Gateway & Webhook Integration, Stripe, PayPal, ConnectID, Weavy

**DevOps & Deployment:** Docker, AWS, Git, GitHub, GitHub Actions CI/CD, Deployment, Server Management

**Core Methodologies:** SOLID Principles, Repository Pattern, MVC Architecture, Performance Optimization, Caching, Queue Processing, Cron Jobs, OpenAPI (Swagger), Postman

## EDUCATION & CERTIFICATIONS

---

### Bachelor of Science in Computer Science

Islamia University of Bahawalpur, RYK Campus — Rahimyar Khan, Pakistan    09/2020 – 06/2024

- AI Fluency — Anthropic
- Claude 101 — Anthropic
