[GitHub Profile](#)  | [LinkedIn Profile](#)  | [View Portfolio](#) 

Full-Stack Laravel Developer and SaaS & API Specialist with 3+ years of experience designing and delivering scalable web applications, mobile app backend, and multi-tenant SaaS platforms. Proficient in REST API development, Stripe payment integration, and full-cycle backend architecture — from database design and server setup to deployment and live system management. Proven ability to build and maintain high-performance solutions across e-commerce, real estate, and service industries with zero downtime. Adept at Git-based workflows, CI/CD automation, and cross-functional collaboration with frontend teams.

SKILLS

- PHP / Laravel Framework
- MySQL / PostgreSQL
- JavaScript / jQuery / AJAX
- REST API Development
- Payment Gateway Integration
- Third-Party & Mobile App API Integration
- cPanel / WHM API | Plesk
- Git / GitHub / GitLab

EDUCATION

B.S. Computer Science (2020-2024)

The Islamia University of Bahawalpur

PROFESSIONAL EXPERIENCE

Dcodax Technologies Islamabad, Pakistan

Aug 2025 – Present

Laravel Developer

- Developing and maintaining large-scale Laravel projects for clients across multiple industries.
- Building REST APIs consumed by mobile apps (driver, customer, supervisor, vendor, user).
- Integrated multiple payment gateways including Stripe and food-delivery payment APIs.
- Led backend architecture for restaurant, real estate, and e-commerce platforms.

Crexed Software House Bahawalpur, Pakistan

Oct 2024 – Jul 2025

Full Stack Developer

- Developed large-scale Laravel projects from scratch and maintained existing live projects.
- Integrated REST APIs and payment gateways including Stripe.
- Led performance optimization efforts, reducing server load and improving response times.
- Built e-commerce platforms with Stripe and other third-party payment integrations.

Web Developer

- Maintained and enhanced existing CRM, HRM, and client-facing web applications.
- Added new features using PHP Laravel and JavaScript; developed and integrated APIs.
- Refactored backend code and optimized SQL queries for improved performance.
- Supported senior developers with database design and third-party integrations.

KEY PROJECTS

Napa Stores – Restaurant Platform | napa-stores.com

Technologies: Laravel, REST API, Payment Gateway

- Built a full-stack restaurant platform with customer app, driver mobile app, and admin panel — featuring real-time order management, live driver tracking, location-based delivery assignment, and integrated payment gateway for secure online payments.

Cuatrod – Real Estate Subdivision Platform | cuatrod.com.mx

Technologies: Laravel, REST API, Push Notifications

- Developed a real estate platform managing subdivision projects with individual lots, ownership records, and a warranty system — customers create support tickets via mobile app, automatically routed to the assigned supervisor who receives push notifications and resolves issues on-site.

WeCares – Multi-Vendor E-Commerce | wecares.store

Technologies: Laravel, REST API, Multi-Platform

- Built a multi-vendor marketplace with vendor registration, admin approval, and multi-branch management — with dedicated APIs for vendor and user mobile apps, and a web dashboard for admins, vendors, and users to manage orders, products, and platform activity.

Borrowmate – Multi-Vendor Rental Platform | borrowmate.heydigital.com.au

Technologies: Bootstrap, Laravel, Till Payment, Weavy-Chat

- Built a multi-vendor rental platform for items, rooms, and houses — with Till Payments, Weavy Chat, ConnectID integration, and role-based permission management for admins, lenders, and sub-users.

Code-Hunter Game

Technologies: Laravel, Bootstrap, QR Code

- Developed a full-stack location-based scavenger hunt platform with a Laravel REST API backend and Flutter mobile app (iOS & Android), where users scan QR codes at real-world locations to earn points, featuring a real-time Firebase-synced leaderboard, Google Maps integration, and an admin portal for managing custom maps, QR code placements, and user performance tracking

ExploreEase – Tour Booking Platform | giftedtaxiandtours.com

Technologies: Laravel

- Developed a tour and accommodation booking platform where users browse destinations and suites with amenity details, submit booking requests, and admins receive automated email notifications for personalized trip planning follow-up.

Pikup – Zone Base Multiple Restaurant | pikup.site

Technologies: Laravel, Bootstrap, Next.js, Stripe Payment

- Developed a multi-tenant SaaS restaurant platform where vendors manage their own storefront, menus, and orders through isolated tenant environments. Integrated Google Maps API for location-based discovery, zone-wise delivery charges, and real-time order tracking across Admin, Vendor, and Driver panels.
