SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications, e-commerce stores, and marketplaces using PHP, Laravel, and Node.js. Skilled in backend development, database optimization, and connecting third-party systems like Stripe payment gateways. Experienced in creating clean, fast, and secure code for web and mobile apps using Vue.js and React. Focused on delivering high-quality business workflows and reliable software solutions.

EXPERIENCE

Full Stack Developer | DCodax Technologies | Islamabad, Pakistan | 10/2025 – 08/2026

- Sped up product launch times by 50% and lowered server costs by 35% by creating a unified shared-codebase backend to power both e-commerce and real estate applications.
- Served over 50,000 active app users while keeping data 100% consistent by designing and scaling fast backend APIs for iOS and Android mobile apps.
- Eliminated 99% of payment errors and made transaction workflows secure by setting up Stripe payment integrations with automatic webhook verification.
- Reduced project delays and changes by 30% by talking directly with clients to turn their business requests into clear technical plans and API designs.

Full Stack Developer | Crexed Software Company | Bahawalpur, Pakistan | 10/2024 – 09/2025

- Kept online stores running smoothly with 99.9% uptime during major product launches by leading the complete system and database design from scratch.
- Helped increase user retention by 15% by writing an automated monthly subscription billing engine with flexible pricing rules.
- Improved external system response speeds by 25% by organizing Stripe, SMS text alerts, and map tracking systems into one centralized code layer.
- Decreased live application bugs by 40% and helped the team write better code by introducing a weekly peer code review process.

PHP/Laravel Developer (Remote) | Pixelz360 | Karachi, Pakistan | 08/2022 – 06/2024

- Sped up new feature delivery times by 20% by cleaning up old PHP code and dividing it into reusable, organized service blocks.
- Made internal business software pages load 45% faster by cleaning up slow SQL database searches and creating better data indexes.
- Achieved 0% system downtime during updates by carefully tracking and testing database changes before releasing app updates.
- Reduced application connection errors by 15% by managing version upgrades and standardizing API endpoints across core CRM and HRM platforms.

PROJECTS

Pikup — Multi-Vendor Restaurant SaaS Platform

- Engineered a multi-tenant SaaS REST API powering customer, restaurant, and delivery-partner apps for a French food-delivery platform.
- Supported table reservations and commission-based restaurant onboarding at scale.
- Delivered third-party integration with Uber Direct (delivery dispatch) and Deliverect (POS syncing).
- Implemented GPS-based live order tracking across a distributed, multi-role app ecosystem.

ForAllDoctors — Global Professional Network Platform

- Built the REST API backend for an international professional network serving doctors, lawyers, and PhDs.
- Implemented end-to-end encrypted messaging, verified-membership workflows, and searchable professional profiles.
- Delivered classifieds, forums, groups, articles, and continuing-education modules powering a high-trust, credential-gated community.

Borrowmate — Multi-Vendor Rental Platform

- Built the backend for a peer-to-peer rental marketplace spanning tools, electronics, properties, and event gear.
- Implemented search, booking, and wishlist functionality across the platform.
- Delivered third-party integration with Till Payments for transactions and Weavy for real-time chat.
- Integrated ConnectID for digital identity verification to support secure, compliant peer-to-peer commerce at national scale

WeCares — Multi-Vendor Healthcare E-Commerce Platform

- Built the backend for a Dubai-based multi-vendor healthcare and wellness marketplace.
- Covered mobility aids, medical devices, pharmacy, fitness, and nutrition product categories.
- Built the central admin panel, vendor storefronts, and customer ordering flows across web and mobile.
- Architected the system to handle regulated healthcare product categories at regional scale.

Napa Stores — Multi-Vendor Delivery Marketplace

- Built the backend for a multi-vendor grocery and beverage delivery marketplace.
- Delivered role-based apps for customers, sellers, and delivery drivers.
- Powered live order tracking and marketplace management across iOS and Android in a fast-scaling regional market.

GOT App & Braaap.ae — Offroad Adventure Community Platform

- Implemented event booking and calendars for tours, training workshops, and group rides.
- Delivered GPS route mapping for ride planning and navigation.
- Built a dual-surface marketplace (in-app classifieds plus the standalone braaap.ae platform) for motorcycles, 4x4s, and gear.

SKILLS

Backend Frameworks: Node.js, Express.js, PHP, Laravel, REST API Development, GraphQL

Frontend Frameworks: React.js, Vue.js, Bootstrap

Database: MySQL, PostgreSQL, Database Optimization

Third-Party Integration: Third-Party API Integration, Payment Gateway & Webhook Integration, Stripe, PayPal, ConnectID, Weavy

DevOps & Deployment: Docker, AWS, Git, GitHub, GitHub Actions CI/CD, Deployment, Server Management

EDUCATION

Bachelor of Science in Computer Science

Islamia University of Bahawalpur, RYK Campus — Rahimyar Khan, Pakistan 09/2020 – 06/2024

CERTIFICATIONS

- AI Fluency — Anthropic
- Claude 101 — Anthropic
